

1. Alteration of Signal Wiring
2. Lighting Switch
 (Isabella TS, TS de Luxe and Coupé)

Bremen, Germany
 February 2nd, 1959

To all authorized BORGWARD Dealers and Workshops

Gentlemen:

1. Modification of Signal Wiring

Connections for head-light signal and horn on the operating switches are interchanged toward one another from serial no.

1 147 013 (Isabella TS and TS de Luxe)
349 353 (Isabella Coupé)

The switching in of these signalling devices is now as follows:

Horn signal: By pressure on button in center of steering wheel.

Head-light signal: By pressure on signal ring of steering wheel.

2. Lighting Switch

A new lighting push type switch (part no. 055 514 43 02) is fitted from serial no. 1 132 033 (Isabella TS and TS de Luxe). By this type of switch a simultaneous flashing of the license plate lamp is abolished. (The specification concerning this was cancelled.)

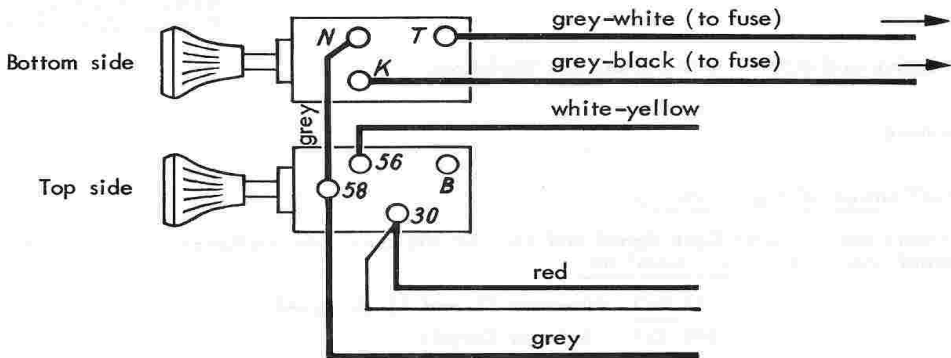

In case of repairs the following hints must be observed:

- a) The lighting switch 055 514 43 01 fitted as standard up to serial number 1 132 032 is no longer supplied as spare part. For repairs please use the new lighting switch 055 514 43 02.
- b) When fitting lighting switch 055 514 43 02 in serial no. up to 1 132 032 please proceed according to wiring diagram on reverse page.

Yours very truly,

Carl F. W. B O R G W A R D G.m.b.H.
 Technical Service Department

Old switch 055 514 43 01 (7 connections)

New switch 055 514 43 02 (4 connections)
